Designed for the Canadian climate

YORK RESIDENTIAL HEAT PUMPS – HMM7

FLEXIBILITY AND ACCESSIBILITY

BENEFITS OF THE HMH7 HORIZONTAL DISCHARGE

- Up to 18 SEER2/8.5 HSPF2 for high-quality, efficient comfort
- 36% quieter operating sound
- 40% smaller footprint compared to traditional vertical discharge units

EFFECTIVE IN CANADA'S CLIMATE

- The HMH7 Series is the state-of-the-art heat pump that offers some of the most reliable heating performance to meet Canada's demands.
- Heat pump technology is now widely accepted as a key solution to reduce GHG emissions and climate change. The latest technologies have been proven to provide a solution while offering the highest levels of heating and cooling comfort.
- The Series meets the requirements of many of the provincial and utility-based rebate offers¹.
- The HMH7B34 model is designed specifically for Canada to have optimum heating performance and efficiency to meet the most stringent standards and is eligible for the federal ccASHP grants (pending).

Advanced manufacturing

State-of-the-art quality control and assembly processes built upon the manufacturing expertise and high standards of Johnson Controls.

Space and budget friendly

Quiet, small-footprint cabinets deliver big performance with features that meet your needs and fit your budget.

Optimized efficiency

Stronger compact components delivering advanced efficiency levels.

VERY LOW NOISE LEVEL

Exact comfort

- Innovative fan design creates less vibration and provides quieter operation, with sound output as low as a typical dishwasher at 54 dBA (36% lower sound levels than standard heat pump units).
- Modulating technology maintains exact temperatures by operating from 35–100% capacity, matching the precise degree of heating required.

one of the **QUIETEST SOUNDS** around your home

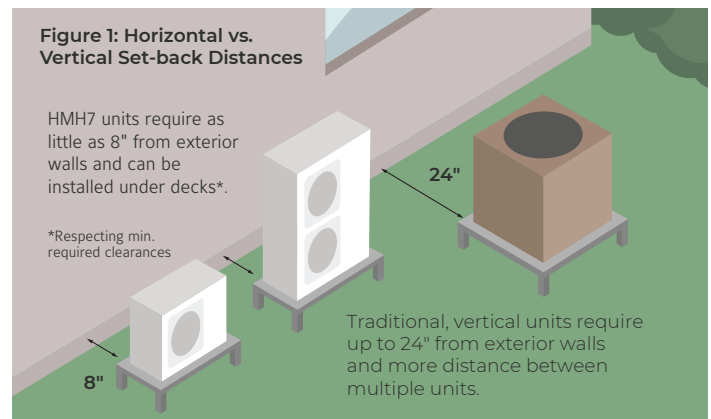

Easier installation

- 40% more compact than standard heat pump units (figure 1).
- Installation kit designed for standard conventional equipment and devices.
- More options for placement and configuration.
- Line set length up to 246' for optimal configurability.
- Horizontal-discharge design removes the need to clear snow or debris buildup.

Figure 1: Horizontal vs. Vertical Set-back Distances

HMH7 units require as little as 8" from exterior walls and can be installed under decks*.

*Respecting min. required clearances

Traditional, vertical units require up to 24" from exterior walls and more distance between multiple units.

Efficient operation

- Inverter system and modulating technology ramp up operation smoothly and continuously adjusts to help increase overall system longevity, reducing energy bills (figure 2).
- Traditional, single-stage heat pumps operate in on or off cycles, which can reduce efficiency and allow temperatures to fluctuate. YORK® HMM7 heat pumps feature advanced, Inverter-driven modulating technology to provide more even, more efficient comfort.
- Provides high heating performance to -21°C and lower.

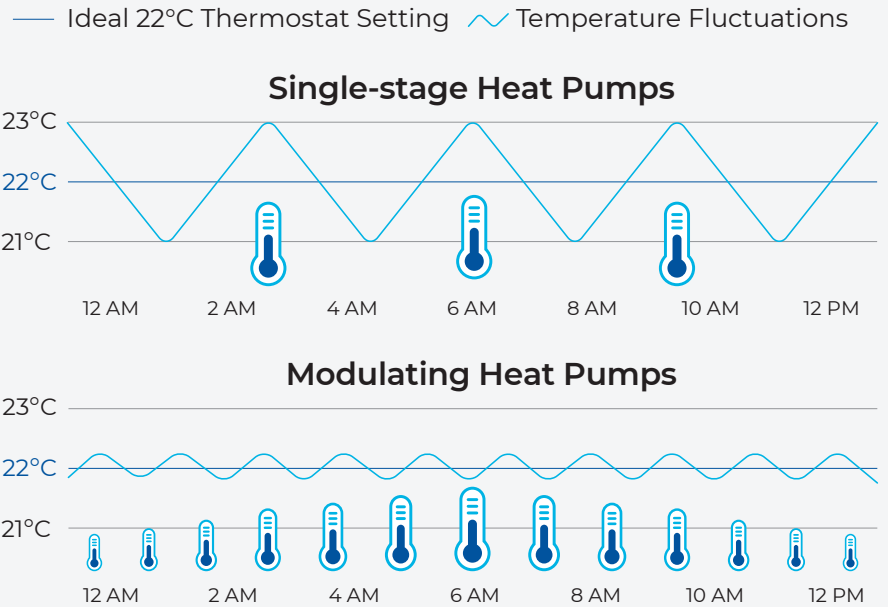

Figure 2: Single-stage vs. Modulating

Safe for the environment

YORK uses R-410A refrigerant, which doesn't harm the ozone and keeps your system safe and efficient.

Awards and distinctions

Year after year, YORK units are listed among the best buys and best products on the market by recognized organizations such as Consumer's Digest and Good Housekeeping.

ACCESSORIES

Optimize your indoor comfort and preserve the health of your family by adding YORK air quality products

High performance media air cleaner

- Captures particles suspended in the air such as contaminants as small as 1 micron. Particles less than 6 microns are invisible; the size of allergen particles and spores varies between 0.5 to 1 micron.
- Reduces risk of asthma and allergic reactions
- Very low static loss
- 5-year limited warranty

BP Series humidifier

- Healthier occupants
- Easy installation
- Ideal for 1,000 to 4,000 sq ft homes
- Extremely low maintenance
- 5-year limited warranty

YORK RESIDENTIAL HEAT PUMPS – HMH7

Professionals dedicated to providing you peace of mind

YORK designs its products to offer comfort, safety and reliability at all times. This is why they rely on a network of certified contractors with the best technical knowledge for the installation of their systems. They will provide you with the best suitable equipment for your needs and install your system for maximum reliability and performance.

Service, quality and technical support: because nothing is left to chance, YORK has been represented for over 50 years in Canada by The Master Group, the largest independent distributor in the field of HVAC-R in Canada. For more than 70 years, The Master Group has distinguished itself for its extensive inventory, exceptional customer service and technical expertise. The Master Group is also a Platinum winner of the renowned Canada's Best Managed Companies awards in recognition for its performance, service and sustainable growth. An additional insurance for peace of mind for many years.

FLEXIBILITY

The HMH7 heat pump is very flexible and can be installed with either a gas or electric furnace. Several AHRI combinations are available and some are eligible for grants.

QUICK SERVICE

Routine maintenance is faster, thanks to easier access for service checks.
